# 1.0 Connected World Account API

---

## Connected World Account API

The Connected World Account API enables you to retrieve your company's Connectbase account information.

### GET Account Information

Issue this call to return your Connectbase account information. The account information returned is based on your API key.

Requirements and Special Considerations
This API requires the appropriate subscription key. The company name is optional since the API returns company data that is specific to your subscription key. If you wish to limit the output to a specific company, include the company name in the request parameter.

Request URL
<a href="https://api.connected2fiber.com/v1/accounts/self[?company_name]">https://api.connected2fiber.com/v1/accounts/self[?company_name]</a>

Request parameters	Characteristic	Description/Requirements
company_name (optional)	string	The name of the company to be returned in the response

Request headers	Characteristic	Description/Requirements
Ocp-Apim-Subscription-key	string	The subscription key that provides access to this API, which can be found in your Profile.
